Aaron is a Certified Online Instructor. He teaches Integrating iPads in the Classroom as an adjunct professor for Marian University.

During the session you will learn:

- how an iPad works and all of the settings options
- how your students can use the iPad to improve learning
- how to efficiently use the "App Store"
- how to use the iPad for word processing, saving, spreadsheets, presentations and printing
- the many ways to use the iPad to save on paper
- how to give assessments that are automatically graded
- how the iPad can be used with "Dropbox" to submit homework electronically

Half or full day professional development options available. The session will be geared towards staff needs. Contact Aaron for further information.

- how to use the iPad with a projector
- how to remotely access any computer via the iPad
- how to create video slideshows on the iPad
- how to create cards, posters and flyers using the iPad
- various apps including: educational apps for the classroom - apps to be used for children with special needs - apps for personal use
- the many iPad accessories that can be used
- the answers to all of your iPad questions
